Adrian Allotey Stands Out!

Transportation is available as part of the services provided in a luxury vehicle that allows for a comfortable and safe ride. Family members are given access to a GPS tracking software of their loved one. Auto insurance, from entering to exiting the vehicle, protects the client. It is rare to see this insurance offered elsewhere, but necessary to safety outside the home.

Detailed progress notes are available at the end of each visit and are electronically available to designated family members so awareness of what was done and observed, including modifications and accommodations, reactions, next steps, resources and recommendations. An electronic format makes it readily available to share with a medical or other support team and serves as the eyes and ears to the medical team and family.

Innovative solutions are continually used to increase communication, safety and companionship.

Medical/Non-medical advanced directives are discussed, created, and shared with family members and the medical team.

Alzheimer's/Dementia memory care strategies, resources and activities minimize cognitive decline.

Care is person centered to ensure quality of life. Individual goals and plans are created with the necessary modifications, accommodations and support. Individual problems are researched, problem solved and shared with concrete solutions.

Care is available on weekends/holidays at no additional cost.

Texting and phone calls are available when non-emergent questions arise and you feel you can't wait for the next visit.

A company credit card is available for necessary purchases; entertainment, food, etc. throughout the month and will be billed on the next month's invoice so there is no need for clients to carry money or credit cards.
